

CONGRESSIONAL CHEMISTRY CAUCUS

The Congressional Chemistry Caucus serves as an informal group for members dedicated to science and education to work on issues regarding the important role chemistry plays in everyday life.

The bipartisan and bicameral caucus is dedicated to educating fellow members, staff, and the public on the benefits of chemistry in today's society. The group also acts as a forum to work together on science and policy related issues dealing with chemistry and encourage today's students to become the chemists of tomorrow.

GOALS

**Boost scientific
research**

**Promote Innovative &
Sustainable Solutions**

**Support STEM Education &
Workforce Development**
